Quick Start Guide

Dimplex®

EPX Panel Heater with RXPW4 Central Controller
QS012

This guide is for quick reference only. Refer to EPX/RXPW4 installation and operating instructions for further information

EPX panel heater

Heater controls

(A) **Thermostat:** slide the thermostat control to the appropriate position to give comfort level required.

Heater will automatically switch on and off as necessary to maintain the selected temperature. A higher setting will make the room warmer.

(B) **Power switch**

(C) **Power ON indicator:** Illuminates when power switch in ON

(D) **Heat indicator:** Illuminates when the heater is delivering heat

Heater operation when connected to RXPW4 controller

The RXPW4 controller allows control of multiple Dimplex heaters from a single point. Heaters can be grouped together in "zones" and each zone configured with a different time program for each day of the week. Up to 4 zones are available.

When connected to an RXPW4 controller, the heater will operate in accordance with the controller program/setting. The program can only be over ridden at the controller.

The heater will provide the following functionality in each of the controller modes:

| Mode	Bars on Display	Heater Function
Comfort / On	4	Thermostat setting
Background	1*	5°C below thermostat setting
Off	1*	Heater does not operate
Frost Protection	n/a	Heater operates when temperature drops below 5°C

* Note the controller can be configured so that the AUTO program operates either as Background or Off modes. Please see RXPW4 installation /operating instructions for further details.

RXPW4 4-zone central controller
|	
1 - Time
2 - Day of the week
3 - Current mode
4 - Zone status reference
5 - Controller setup/override buttons
6 - Validation button
7 - Holiday mode
8 - Selector switch index mark
9 - Mode selector switch

Initial set up: Setting the time and day
1. Turn the mode selector switch to the ⏰ position.

2. Use the "+" and "-" buttons to cycle through the hours/ days of the week until the correct time/day is set.

3. Press OK to confirm.

Note: Typically 1 = Sunday, 2 = Monday, etc.

Setting the daily program for each zone
1. Turn the mode selector switch to the PROG position.

2. Use the "+" and "-" buttons to select the zone you wish to programme (e.g. P=1). Press OK to select.

3. Use the "+" or "-" buttons to set the program for each hour of day 1 (i.e. Sunday).

4. "+"sets an hour of Comfort (on) and "-" sets an hour of Background (off). The hours of the day are denoted across the bottom of the display.

5. Press OK to confirm when the program has been set. The programme for day 2, etc. can then be set in the same way.

6. To copy the program from one day to the next, hold down the OK button for 5 seconds.

7. Once the daily programs have been set for Zone 1, repeat the process for Zones 2 - 4.
Everyday operation

1. To run the program, set the mode selector switch to the AUTO position.

2. The status of each zone is indicated on the display (1 bar = background (off), 4 bars = Comfort (on)).

3. For details of how to over ride or advance the automatic program, please refer to the RXPW4 operating instructions.
